

CDI ICD-9/ICD-10 Comparison

Topic: Gestational Diabetes

ICD-10	ICD-9
<p>INDEX:</p> <p>Diabetes, gestational (in pregnancy) O24.419 affecting newborn P70.0 diet controlled O24.410 in childbirth O24.429 diet controlled O24.420 insulin (and diet) controlled O24.424 puerperal O24.439 diet controlled O24.430 insulin (and diet) controlled O24.434</p>	<p>INDEX:</p> <p>Diabetes, gestational 648.8 Complicating pregnancy, childbirth, or puerperium 648.8</p>
<p>TABULAR:</p> <p>O24.4 – Gestational Diabetes Mellitus</p> <p>Diabetes mellitus arising in pregnancy Gestational diabetes mellitus NOS</p> <p>O24.41 – Gestational Diabetes in PREGNANCY O24.410 – ...diet controlled O24.414 – ...insulin controlled O24.419 - ...unspecified control</p> <p>O24.42 – Gestational Diabetes in CHILDBIRTH O24.420 – ...diet controlled O24.424 – ...insulin controlled O24.429 - ...unspecified control</p> <p>O24.43 – Gestational Diabetes in PUERPERIUM O24.430 – ...diet controlled O24.434 – ...insulin controlled O24.439 - ...unspecified control</p>	<p>TABULAR:</p> <p>648.8 – Abnormal Glucose Tolerance</p> <p>Conditions classifiable to 790.21-790.29 Gestational Diabetes</p> <p>[0-4] (5th Digits to Denote Current Episode of Care)</p> <p>.0 – unspecified as to episode of care or N/A .1 – delivered, w/ or w/o mention of antepartum condition .2 – delivered, with mention of PP complication .3 – antepartum condition or complication .4 – postpartum condition or complication</p> <p>(NOTE) 790.21 – impaired fasting glucose 790.22 – impaired glucose tolerance test (oral) 790.29 – other abnormal glucose</p>

DOCUMENTATION/CODING

- Current episode of care is no longer needed.
- We need to know if the gestational diabetes is diet-controlled or insulin-controlled
- Z79.4 “Long Term Use of Insulin” – we will probably need to assign this code instead of the V58.67

DRG's

- Gestational diabetes is not an MCC or CC.
