Where to find complication affecting specific body systems: ICD-10 classifies many intraoperative & postprocedural complications within the specific body system chapters. (code only complications not external causes or place of occurrence for this puzzle)

Across
2 Accidental laceration of the spleen during procedure not on the spleen (such as during colectomy)
4 Ventilator associated pneumonia
6 Adverse effect of chemotherapy, initial encounter (also code nature of effect - see 12 down)
8 Displaced cardiac pacemaker electrode, initial encounter
9 Cardiac arrest during a coronary artery bypass
10 Bloodstream infections due to central venous catheter, initial encounter
11 Persistent post-op fistula, subsequent encounter
15 Adhesions due to foreign body accidently left in body following a surgical procedure, initial encounter
16 Broken right hip prosthesis, initial encounter
Where to find complication affecting specific body systems: ICD-10 classifies many intraoperative & postprocedural complications within the specific body system chapters. (code only complications not external causes or place of occurrence for this puzzle)

Down
1. Postlaminectomy syndrome, NEC
2. Accidental laceration of the spleen during an operation on the spleen
3. Postprocedural pelvic adhesions
4. Acute postprocedural respiratory failure
5. Cataract lens fragment in right eye following cataract surgery
7. Cardiac arrest during a noncardiac procedure
10. Air embolism following transfusion, initial encounter
12. Chemotherapy induced aplastic anemia (for the "T" code - see 6 across)
13. Headache due to lumbar puncture
14. Neuroma of amputation stump, left lower extremity
15. Kidney transplant rejection
Where to find complication affecting specific body systems: ICD-10 classifies many intraoperative & postprocedural complications within the specific body system chapters. (code only complications not external causes or place of occurrence for this puzzle)
